I love Roblox, but there are a few issues that I think need to be fixed. I have noticed that there is a lot of adult themes, and people swear a lot (which is not acceptable, it should only be in forums, not in game). It also needs more updates. In my opinion you should only take down the website if you combat online harassment or if someone steals someone else's idea. You can't create an account with your email address or password because the website doesn't know who you are. It only knows your username which is so unfair because someone could send harassing messages to other players without them knowing the real person. You should add more games and less glitches, with more updates. I really hope you take my suggestions into consideration, it would be great if you fixed all the big issues in Roblox.

The news has attracted mixed responses from users. Some believe it's an improvement since it's more reliable, and fixes most of the bugs that caused users to constantly lose their work. Others think that it is useless due to the fact that ROBLOX Studio randomly changes collision methods and there are no descriptions on how to remedy this problem. Some have even started questioning how Roblox handles the games they host as well as some of their policies towards adult players/contents, and other problems like spam bots.

Robux. Robux is the currency of Roblox that can be purchased with real money, although there are also other ways to receive them within the system of Roblox itself. The way they work is very simple - you can use Robux to purchase in-game items, such as clothes for your character or even full-on animations such as dances and others. This adds a form of virtual economy to the game which adds depth and meaning into it - although the impact of the impact that this has on the game can be debated heavily depending on who you talk to. This means that, while there is a sense of the possibility of winning content within the game - there is no chance of getting content without paying for it.
